

Field Day is June 24. 023 at 2:00pm to June 25, 2023 at 2:00 PM The public is most welcome.

Remember this place? It's the barn at the Metro Parks Farm where we've held Field Day for a number of years. June 24 and 25 are this year's dates. Propagation is improving, which means we should have an opportunity for more QSOs which add up to more points. To make this year a success, we need your help with the following:

1. Friday setup, June 23. Nothing happens Saturday unless we have a crew Friday getting things ready. In past years, we've met around 1 pm and worked until evening.
2. Saturday morning network and radio setup, June 24. This is when we get the electronics up and running, tested, and ready to go for the 2:00 start time.

3. Operating. Prez sez we should operate as 8A again this year. This means we need a lot of operators to fill the chairs, as well as some overnight ops to keep an eye on things

4. Dinner. We can use a group of hungry ops to help consume the fantastic meal that Dean and his crew make every year.

5. Tear-down. All good things must eventually end, and we need a crew to take down antennas and pack up equipment.

This starts at 2 pm. Come out to Field Day! We'll see you there.
